Herbal Oils

Herbal Medicated Oils are intended for external use only!

Herbal oils are vegetable oils that have been infused with the properties of specific herbs and aromatherapy blends. Applied externally they impact the individual on very deep levels because they are absorbed into the blood stream and routed through the body. Herbal oils are generally applied warm because this relaxes the nervous system and opens the pores, allowing absorption to happen more efficiently. The scent of the oils can also impact the psyche quickly. The olfactory system stimulates the pineal gland almost instantaneously. Warm herbal oils can be applied directly to the entire body or to specific areas. Oils can be used in the bath (1 teaspoon per bath), as an Ayurvedic oil treatment and as massage oil.
